

COMP4513 Node 1 Lab Instructions

I have (at least) two separate Node labs. The files and instructions are in the book's official labs (<https://funwebdev3rd.gumroad.com/l/lab-set-one>). The first lab is Lab 13: Beginning Node, which is 30 pages with 16 exercises. While these step-by-step exercises (and the test-your-knowledges) aren't marked, I do think they will help you learn Node in a more hands-on manner.

What I will be marking is Project 1 of Chapter 13. You can find the files and the relevant pages from the book at:

<https://github.com/mru-comp4513-archive/comp4513-f2021-node1>

You can download the starting files as a zip or use git to clone the repo.

I would try to finish this lab by Nov 11 (or even earlier).
